Your Notes

Nothing to show here,Use Add Notes section above to add your notes here.

- **Features** -
 1. Make a good UI/UX.
 2. Notes should be added from new to old.
 3. When there are no notes then display a message like you are seeing in UI.

4. There should be a delete button in every note so that you can delete a note.
5. Notes should be stored in local storage and should be deleted after you delete a note.
6. There should be a search feature of note so that you can search your note by title.
